

International Journal of
**ADVANCES IN THERMAL SCIENCES AND
ENGINEERING**

VOLUME 4

NUMBER 1

JANUARY-JUNE 2013

CONTENTS

1. Performance Analysis of Solar Air Heater Duct having Protrusions as Roughness Geometry1-7
Brij Bhushan and Ranjit Singh
2. Experimental and CFD Analysis of Solar Water Heating System Using Phase Change Material 9-13
B. B. Devarale and B. S. Gawali
3. Parametric Studies on Combined Conduction-mixed Convection-radiation from a Discretely and Non-identically Heated Electronic Board 15-20
G. Ganesh Kumar and C. Gururaja Rao
4. Numerical Studies on Droplet Evaporation at High Ambient Pressures & Temperatures21-25
Neel Kanth Grover, Rajiv Arora, Anjan Ray and S. R. Kale
5. Comparison of Performance Characteristics of Direct Injection Diesel Engine Using Blends of Karanja Oil, Cottonseed Oil, Neem Oil with Diesel27-31
N. Rao, C. V. Gopinath, P. Revi Kumar and K. S. Raghuram
6. Investigation of Bubble Spacing in Subcooled Flow Boiling of Water in Horizontal Annulus using High Speed Flow Visualization33-36
Ugandhar Puli
7. Thermodynamic Optimization of Cross Flow Plate-fin Heat Exchanger using Artificial Bee Colony (ABC) Algorithm 37-43
R. Venkata Rao and Vivek Patel
8. Cryogenic Application of Composites Materials45-51
Rajiv Sharma, V. L. Tanna and B.V. Dave
9. CSO_ABC: A Hybrid Optimization Algorithm for Design Optimization of Compact Heat Exchangers53-58
R. V. Rao and Vivek Patel
10. Improving Reliability and Availability of Turbo-Generator Unit Using Condition Monitoring for Thermal Power Plant59-63
Y. D. Vora, M. B. Patel and M. P. Khere
11. An Alternative Technology of Air Induction in a Conditioned Space65-70
V. N. Bartarin and S. P. S. Rajput
