

**CONTENTS**

1. Efficient Utilization of Biomass by Gasification – A Case Study ..... 83-89  
*A. J. Keehe, G. Anbu Prasad Rao & R. G. Tated*
2. Simulation of a Supercritical CO<sub>2</sub> Based Natural Circulation Loop with ..... 91-96  
End Heat Exchangers  
*Ajay Kumar Yadav, M. Ram Gopal & Souvik Bhattacharyya*
3. Numerical Investigation of Flow Through Annular Curved Diffusing Duct ..... 97-102  
*P. K. Sinha, A. N. Mullick, B. Halder & B. Majumdar*
4. Optimization of Operating Parameters of Desiccant Wheel for Regeneration ..... 103-108  
Temperature  
*Anandhesh Yadav, V. K. Bajpai*
5. Water Droplet Transport in Gas Flow Channel of PEM Fuel Cell ..... 109-115  
*K. A. Raman, B. Mondal & Xianguo Li*
6. Numerical Investigation of Mixed Convection Heat Transfer Past Five ..... 117-121  
In-Line Square Cylinders  
*Md. Raju & D. Chatterjee*
7. Multicriteria Evaluation of Natural Gas Energy Systems Using Graph Theory ..... 123-129  
and Analytic Hierarchy Process Methods  
*Pramod B. Lanjewar, R. V. Rao & A. V. Kule*
8. Thermodynamic Study of Solar Powered Absorption Refrigeration Unit ..... 131-136  
*M. Kumar & R. K. Das*
9. Performance, Analysis and Comparison of Inertance Type Pulse Tube ..... 137-141  
Cryocooler with and without Reservoir  
*Nimesh K. Soni & Anjana N. Prajapati*
10. Multi-objective Optimization of Axial  $\Omega$  Shaped Micro Grooves Heat Pipe ..... 143-148  
Using Grenade Explosion Method (GEM)  
*R. V. Rao & R. D. Rakhade*
