

Indian Journal of Electrical Engineering and Modern Technology

Volume 6, Number 2 (2016)

Contents

- Implementation of an Efficient Bio-Inspired Shuffled Frog Leaping Algorithm for Power System Stability Enhancement** **87-100**
R. Shivakumar¹, P. Tamilarasu² and M. Panneerselvam³
- Modeling, Analysis and Simulation of Robust Control Strategy on a 10kVA STATCOM for Reactive Power Compensation** **101-122**
J.K. Moharana^{}, M. Sengupta and A. Sengupta*
- Modeling and Simulation of Closed Loop Controlled PFC Half Bridge Converter Fed PMBLDC Motor using Simulink** **123-135**
C. Umayal¹ and S. Rama Reddy²
- High Frequency Modeling of Two Limb Series Loop Winding for Partial Discharge Localization** **137-148**
Santosh Kumar Annadurai¹ and Udayakumar K.²
- Transmission Congestion Management in Restructured Power System by Generation Rescheduling and Load Shedding using Evolutionary Programming based OPF** **149-157**
¹Elango K. and ²S.R. Paranjothi
