CONTENTS

Factors influencing the mechanical properties of lightweight aggregate concrete Tao Wu, Hui Wei, Xi Liu & Guohua Xing	301
Evaluation of the mechanical, durability microstructural and mineralogical properties of cement composites treated with waste tire rubber Ozlem Celik Sola & Cemil Ozyazgan	312
Study the surface modification and characterization for powder mixed electrical discharge machining of tungsten carbide Jagdeep Singh & Rajiv Kumar Sharma	321
Strain-rate sensitivity of tensile behaviors for nickel-based superalloys GT13044 and GH4033 at room temperature Changying Wang, Qinglong An, Qiulin Niu & Ming Chen	336
Numerical study of TTP curves upon welding of 6063-T5 aluminium alloy and optimization of welding process parameters by Taguchi's method José L. Meseguer-Valdencbro, Antonio Portoles & J Oñoro	341
Effect of cutting parameters on machining surface and cutting tool in milling of Ti-6Al-4V alloy Yahya Hıyman Çelik & Ahmet Karabiyik	349
New sharpening method and the behaviour of the multi-flute twist drill with curved cutting edge in machining operations Nicuşor Baroiu, Virgil Gabriel Teodor, Silviu Berbinschi, Florin Susac & Nicolae Oancea	357
