

Contents

12
253

1. An Algebra to Represent Task Flow Models 81-92
Carlos Alberto Fernandez-y-Fernandez, Anthony J. H. Simons
2. Constraint Propagation Tree for the Realization of a Computing with Word Based Question Answering System 93-105
Elham S. Khorasani, Shahram Rahimi
3. A High Performance Crash Recovery Approach for Distributed Systems 107-113
Bidyut Gupta
4. Dynamic allocation & Deallocation of Buffering in High Speed Switch 115-125
Vishnu Priya. A and Senthil Kumar. P
5. A Genetic Algorithm inspired Routing Protocol for Wireless Sensor Networks 127-136
Ayon Chakraborty, Swarup Kumar Mitra & Mrinul Kanti Naskar
6. Designing an Intelligent Learner Genetic-Fuzzy Model for an Oil Industry Supply Chain on the Basis of Self Organized Maps 137-153
Babak Akhgar, Mohammad Hussein Sherkat & Payam Hanafizadeh
7. A Quality Metric for Wrapper Methods in Multiclass Subject Invariant Brain Computer Interfaces 155-165
Vikas Goutemukkula, Jesse Sherwood & Reza Derakhshani
8. On Strategic Coordination 167-175
Henry Hexmoor
9. Quantitative Evaluation of Virtual Private Networks and its Implications for Communication Security in Industrial Protocols 177-187
Sanaz Rahimi & Mehdi Zargham
