

International Journal of Electronics and Communication Engineering

Volume 10, Number 2 (2017)

Contents

- Design of Modified Reconfigurable Fir Filter Using Russian Peasant Multiplication Technique** 93-104
¹K. Gunasekaran and ²Dr. M. Manikandan
- Estimation of Signal Strength in a WSN for Application in War Ship** 105-110
Ananya Sarkar¹, Subhasish Majumdar² and Partha Pratim Bhattacharya³
- Mobile Computing** 111-117
Sukhdeep Kaur, Shobti Saini and Ritham Vashisht
- Bandwidth Aided Topology Awareness in Unstructured P2p Networks** 119-123
¹B. Lalitha and ²CH. D.V. Subba Rao
- Developing Manual Control for a Line Follower Robot** 125-130
Lucky Gautam¹, Rahul Kr. Verma², Chinoy Sharma³
- Underwater Wireless Communication Network** 131-135
Alok Ranjan¹, Ashish Ranjan²
- Development of Photovoltaic Electric Carts Using High Efficiency MPPT Algorithm** 137-142
Hyoung-Keun Park¹ and Myeong-Hun Yang²
- Efficient Electric Vehicle Charging System for Enhanced Power Delivery** 143-151
Juyong Lee¹, Jihoon Lee¹, Young-gon Choi², Bryan Kisoo Chang²

An Efficient MAC Protocol to Reduce Packet Loss in the WBSN Environment

Rae Hyun Kim and Jeong Gon Kim¹

Optimization of Rear Contact in Nanowire Silicon Solar Cell

Rakesh Kumar Patnaik¹, Devi Prasad Pattnaik², and Chayanika Bose¹

Optimum Gain Settings of PID Controller using Multi-objective Genetic Algorithm

Ruchi Bansal and Bharat Bhushan

Detection of C&C Zeus packets via Pseudo Decryption of Packet Length Field

ChulWoo Park¹, HyoSung Park², KiChang Kim^{3}*
