

CONTENTS

1.	Selection of an optimum flux density to offer reduced core loss and its effect on temperature rise of transformers	197
	<i>Karunakara K, Ashitha P N and Ganga S</i>	
2.	Multi-Objective Optimization incorporating TCSC with ramp-rate limits and prohibited operating zones using NSHCSA	203
	<i>Balasubbareddy M</i>	
3.	Seismic Qualification of Busbar Trunking System	217
	<i>Panneer Selvam R and Ramesh Babu R</i>	
4.	Review on degradation of EVA encapsulated PV Module by UV ageing	223
	<i>Lahari N V and Ganga S</i>	
5.	Carbon emission reduction through an electrical energy audit in thermal power plant – Indian scenario	231
	<i>Anil Onkar B, Dhomane G A, Moharil R M and Prashant P Mawle</i>	
6.	Customer segmentation based on electrical consumption in a VPP Environment: Technologies and Applications	245
	<i>Vijayalakshmi Anbazhagan, Shanti Swarup K, Haile- Selassie Rajamani and Prashant Pillai</i>	
7.	Techno-Economic Aspects in Electricity Market Operations with Grid Interfaced Electric Vehicles	253
	<i>Prateek Jain and Trapti Jain,</i>	
8.	Network Reduction of Power System for Transient Stability Studies	263
	<i>Ashwin N, Sreedevi J and Pradip Kumar Dixit</i>	
9.	Electricity Point Price Evaluation Using Hybrid Algorithm	269
	<i>Rajagopal Peesapati V V, Anamika and Niranjana Kumar</i>	
10.	Grid connection to CPP in a deregulated electricity market: A case study related to fault current levels	277
	<i>Akshata A Kotharkar, Punekar G S</i>	
11.	SRF Based Control of Single Stage Dual Purpose Three-Phase Grid Integrated Solar PV System	285
	<i>Vivek Narayanan and Jayaprakash P</i>	
12.	Evaluation of Dynamic Performance Unified Power Quality Conditioner controlled with various intelligent control schemes	295
	<i>Satyanarayana Vanapalli and Venu Gopala Rao M</i>	
13.	Hybrid Transient Stability Analysis of Power Systems having Large Penetration of Doubly Fed Induction Generator Based Wind Energy Conversion System	303
	<i>Tulika Bhattacharjee and Chaitra T.M.S</i>	
14.	Colliding bodies optimization algorithm for optimal reactive power dispatch	311
	<i>Anbarasan P and Jayabarathi T</i>	

15.	On Estimation of Rate of Change of Frequency for Relay Settings during Power Export to Grid from a CPP	<i>Srikanth Bhatt N, Gopi Krishna Menon and Gururaj Puneekar S</i>	319
16.	Realizing the Laboratory Model for Reverse Power Protection of Alternator Interfaced with GSM	<i>Sumit Srivastava and Ankit Niranjana</i>	327
17.	Preclusion of Partial Discharge from Transformer Insulation - A Design Perspective	<i>Dhruvesh Mehta, Prasanta Kundu, Anandita Chowdhury and Lakhiani V K</i>	333
18.	Evolutionary Approach to Stackelberg Game based Demand Response for Electric Vehicle Charging	<i>Priyanka Shinde and Shanti Swarup K</i>	345
19.	Immittance Based Stability Assessment for Multi Paralleled 3-Ø PV inverters Connected to Grid	<i>Ravi Sankar R S and Jayaram Kumar S V</i>	355
20.	Insulation Coordination of EHV Systems – An Overview	<i>Meera KS and Kanyakumari M</i>	365
21.	Admittance Based Algorithm of Dynamic Voltage Restorer for Improved Power Quality	<i>Rajagopal V, Sabha Raj Arya, Bangarraju J, Sanjay Patel K and Nagamalleswari V</i>	375
