

Contents

1. Mathematical Analysis, Adaptive Control and Synchronization of a Ten-Term Novel Three-Scroll Chaotic System with Four Quadratic Nonlinearities 1-20
Sundarapandian Vaidyanathan
2. An Eleven-Term Novel 4-D Hyperchaotic System with Three Quadratic Nonlinearities, Analysis, Control and Synchronization via Adaptive Control Method 21-43
Sundarapandian Vaidyanathan
3. Design of a Mowing Robot and Implementation of Its Dead Reckoning System 45-60
Chen Yang and Chung-Liang Chang
4. A Five-Term 3-D Novel Conservative Chaotic System and its Generalized Projective Synchronization via Adaptive Control Method 61-78
Sundarapandian Vaidyanathan and Sarasu Pakiriswamy
5. Optimized Method using Pre-Handler, Clustering and SKNN Imputation (OPCSI) for handling Missing Value 79-83
S. Kavitha and M. Hemalatha
6. Anti-Synchronization of Identical Chaotic Systems via Novel Sliding Control Method with Application to Vaidyanathan-Madhavan Chaotic System 85-100
Sundarapandian Vaidyanathan and Sivaperumal Sampath
7. Synchronization and Anti-synchronization of Coupled Hindmarsh-Rose Neuron Models 101-114
Christos K. Volos, Dimitrios Prousalis, Ioannis M. Kyprianidis, Ioannis Stouboulos, Sundarapandian Vaidyanathan and Viet-Thunh Pham
8. A Novel 3-D Conservative Chaotic System with a Sinusoidal Nonlinearity and its Adaptive Control 115-132
Sundarapandian Vaidyanathan
9. Fuzzy AHP for Control of Data Transmission by Network Selection in Heterogeneous Wireless Networks 133-140
Raman Kumar Goyal, Sakshi Kaushal and Sundarapandian Vaidyanathan
10. Design, Analysis of the Genesio-Tesi Chaotic System and its Electronic Experimental Implementation 141-149
Aceng Sambas, Sundarapandian Vaidyanathan, Mustufa Mamat, Mada Sanjaya WS and Rizki Putra Prastio
11. Analysis, Control, Synchronization and LabVIEW Implementation of a Seven-Term Novel Chaotic System 151-174
Sundarapandian Vaidyanathan and Karthikeyan Rajagopal
12. Adaptive Control, Synchronization and LabVIEW Implementation of Rucklidge Chaotic System for Nonlinear Double Convection 175-197
Sundarapandian Vaidyanathan and Karthikeyan Rajagopal

13. A Novel 3-D Jerk Chaotic System with Two Quadratic Nonlinearities and its Adaptive 199-219
Backstepping Control
Sundarapandian Vaidyanathan
14. Hybrid Synchronization of Identical Chaotic Systems via Novel Sliding Control Method 221-235
with Application to Sampath Four-Scroll Chaotic System
Sivaperumal Sampath and Sundarapandian Vaidyanathan
15. Adaptive Control and Synchronization Design of a Seven-Term Novel Chaotic System 237-256
with a Quartic Nonlinearity
Sundarapandian Vaidyanathan and Sarasu Pakiriswamy
16. A Novel Hyperchaotic Hyperjerk System with Two Nonlinearities, its Analysis, 257-278
Adaptive Control and Synchronization via Backstepping Control Method
Sundarapandian Vaidyanathan
17. A Highly Chaotic System with Four Quadratic Nonlinearities, its Analysis, Control and 279-297
Synchronization via Integral Sliding Mode Control
Sundarapandian Vaidyanathan
18. Backstepping Control Design for the Adaptive Stabilization and Synchronization of the 299-319
Pandey Jerk Chaotic System with Unknown Parameters
*Sundarapandian Vaidyanathan, Kavitha Madhavan and
Babatunde A. Idowu*
19. A Novel Hyperchaotic System with Two Quadratic Nonlinearities, its 321-337
Analysis and Synchronization via Integral Sliding Mode Control
Sundarapandian Vaidyanathan and Abdesselem Boulkroune
20. A Novel 4-D Hyperchaotic System with Three Quadratic Nonlinearities, its 339-356
Adaptive Control and Circuit Simulation
*Sivaperumal Sampath, Sundarapandian Vaidyanathan and
Viet-Thanh Pham*
21. Power System Dynamic Stability Using Static VAR Compensator 357-367
Powered With Fuzzy Logic Controller
A. Mohamadi Jahandizi and S. Ali Ghafelebashi
