- | | | |
|------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------|---------|
| Eigen Values and Energy of Group Graphs | Ranjini, P. S., Loksha, V. & K. A. Germina | 55-59 |
| Numerical Study of Double-diffusive Radial Magneto-Convection in Cylindrical Annuli | H. S. Shivashankar
B. M. R. Prasanna, S. Sreedhara & M. Sankar | 61-72 |
| Algorithm for Segmentation of Medical Images Based on Watershed Transform | D. Jayalaxappa, & D. S. Murty | 73-78 |
| Markov Chains: An Application for Object-Oriented Extensible Design Patterns Based Scenario Templates for Testing Embedded Systems | Ramesh Babu B. N.
Lokesh, V. & Nagabuthan, B. S. | 79-85 |
| Modeling of Distance Relay Using RTDS | T. Ananthanpadmanabha
A. Anrithakala, P. Mamatha
Shobha Shankar, T. P. Surekha & Prakash B. | 87-96 |
| Ultimate Homogeneous Supply Chain for an Demand Moments: The Company Perspective | S. Bhuvaneshwari & K. Meena | 97-104 |
| An Inventory Ordering Policy Using Three Parameter Weibull Deteriorating Items with Quadratic Pricing Demand | Sudhir K. Sahu & Gobinda C. Panda | 105-112 |
| Symmetric 3-Graphs | P. Siva Kota Reddy, M. S. Subramanya & R. Rajendra | 113-117 |
| Concepts of Graph Theory Relevant to Ad-hoc Networks: A Survey | M. A. Rajan, Anjan Kumar K. N.
M. Girish Chandra
Lokanatha C. Reddy & Prakash Hiremath | 119-135 |
| Operator N^α Method to Non-Homogeneous Gauss and Confluent Gauss Equations | Chona Ram & Pashpa Choudhary | 137-144 |
