Reg No.: Name:

APJ ABDUL KALAM TECHNOLOGICAL UNIVERSITY

FIRST/SECOND SEMESTER B.TECH DEGREE EXAMINATION, JULY 2018

Course Code: EC100 Course Name: BASICS OF ELECTRONICS ENGINEERING Max. Marks: 100 **Duration: 3 Hours** PART A Marks Answer all questions, each carries 5 marks Write four important milestone developments in the evolution of electronics and 1 (5) also give typical applications of electronics in different fields. 2 Differentiate between intrinsic and extrinsic semiconductors also plot the V-I (5) characteristics of a silicon PN junction diode. 3 Draw and explain the basic components of a public address system. (5) 4 What are universal gates? Why are they called so? List out the important (5) properties of an ideal operational amplifier. 5 Define modulation. What are the different types of analog modulation schemes? (5) Explain the need for modulation. 6 What is the super-heterodyne principle used in communication system. What are (5) the typical frequencies used in AM and FM? 7 List out the major advantages of optical fiber communication system. (5) 8 Explain the different components in CCTV system. (5) PART B Answer six questions, one full question from each module and carries 10 marks **Module I** 9 a) Explain the principle of operation of transformer. What are the basic (5) specifications of a transformer? b) What are the different types of capacitors based on the dielectric material used (5) also explain the working principle of an electrolytic capacitor with suitable sketches. OR 10 a) With neat diagrams explain the principle and working of electromagnetic relays. (5) b) What are the different classifications of resistors and also mention the importance (5) of tolerance. Find the resistance value a resistor with the following colour code-Yellow, violet, gold and brown.

Module II

11 Explain the input and output characteristics of common emitter amplifier and also draw its frequency response.
