

Editors

K. Balaji Rao

B.H. Bharatkumar

Contents

- 45-23 Multivariate adaptive regression splines model to predict strength characteristics of high performance concrete
T. Shanmugapriya, R.N. Uma and K. Murali 231
- 45-24 Behavior of concrete beams reinforced with low ratio of flexural steel reinforcement
Azad A. Mohammed, Dunyazad K. Assi and Alan S. Abdulrahman 240
- 45-25 An experimental study on cracking mode in reinforced concrete structures using acoustic emission testing
R. Vidya Sagar 249
- 45-26 Seismic fragility curves for old reinforced concrete building
V.S. Patil and S.N. Tande 264
- 45-27 Adjustment factors for direct-embedded transmission pole foundations
Sriram Kalaga 275
- 45-28 Uplift capacity of plate anchors: application to transmission poles
Sriram Kalaga 283
- 45-T2 A numerical investigation on postbuckling behavior of composite cantilever columns at elevated temperature
G. Venkateswara Rao and K. Durga Rao 294
- News and Notes 300
