

JOURNAL OF ADVANCED RESEARCH IN COMPUTER ENGINEERING

VOLUME 12

NUMBER 2

JULY-DECEMBER 2018

Contents

1. Sliding Mode Controller for Parallel Rotary Double Inverted Pendulum: 93-102
An Eigen Structure Assignment Approach
Bipil Krishna, Deepak chandran and V.I. George
2. Encapsulated Piezoresistor Cantilevers as Affinity Sensors: A Review 103-113
Kapil Sadani and Pooja Nag
3. Development of Antitheft Module with Real-Time Tracking and Engine..... 115-120
Locking System for Vehicle
Sumit Shinde, Sravani Vemulapalli and Dayananda Nayak
4. Ascent Trajectory Optimiztion for the First Stage of a two - Stage - to - Orbit..... 121-128
Reusable Launch Vehicle with Load Factor Constraint During re - entry
Winston Netto and Sherine Jesna V.A
5. A New 4-D Conservative Chaotic System with Coexistence of Hidden Chaotic..... 129-136
Orbits
Jay Prakash Singh and Binoy Krishna Roy
6. Trajectory Tracking Control of an AMM Modelled TLFM using Backstepping 137-144
Method
K. Lochan and B. K. Roy
7. Object Identification Based on 3-D Features Using Structured Light Technique..... 145-156
*C. R. Srinivasan, A. Vinothkumar, R. Senthilnathan, R. Sivaramakrishnan
and R. Srividya*
8. Coordinated Control of an Isolated DC Microgrid with Dynamic Source Variation..... 157-166
and Wide Load Fluctuation
*Soumya Samanta, Jyoti Prakash Mishra, Chayan Bhattacharjee and
Binoy Krishna Roy*
