

Advances in Wireless and Mobile Communications (AWMC)

Volume 11, Number 2 (2018)

Contents

- Efficient analysis of Defects using Naïve Bayes Classification and Impact on Effort and Cost of the Project** 91-99
Dr. S.Veni and Aparna Srinivasan
- Supervised Machine Learning Techniques for Predicting the Risk Levels of Gestational Diabetes Mellitus** 101-109
Srideivanai Nagarajan RM. Chandrasekaran and P. Ramasubramaniam
- A Steganographic Method Based on Modified Pixel-Value Differencing** 111-118
Azhar Ahmad Jaini and Ghazali Sulong
- Formal Verification on Signcryption Re-Cryptography: Secure and Efficient Approach towards Trust Problem** 119-134
Gautam Kumar and Hemraj Saini
- A Survey on Gamma Interconnection Network Family** 135-162
Meenal Borkar and Atul Kumar
- Simplification of Switching Functions Using Hex-Minterms** 163-174
Sahadev Roy and Chandan Tilak Bhunia
- COVERED: Content-Version based Removal of Duplicates** 175-192
Jyoti Malhotra¹ and Jagdish Bakal²
