

International Journal of COMPUTING AND APPLICATIONS

VOLUME 13

NUMBER 2

JULY-DECEMBER 2018

CONTENTS

28. Computational Comparison of Various Existing Edge Detection Techniques for Medical Images211-219
Savita Dubey and Yogesh Kumar Gupta
29. Optimal Component Selection for Elicit Model using Complexity Metrics221-225
Kavita, Gaurav Aggarwal and Neha Sharma
30. CFDI-SS: Cyclostationary Feature Detection with Inverse Covariance Matrix based Spectrum.....227-232
Sensing in Cognitive Radio
B. Anil Kumar and P. Triniatha Rao
31. Fake Currency Note Identification using Deep Convolutional Neural Networks233-239
Hritik Jain and S.K. Pal
32. A Survey on Object Recognition Methods241-246
Nuramal Islam, Senjam Hembra, Vijay Prasad and Yumnam Jayanta Singh
33. Feature Extraction Techniques for Hindi Speech Recognition System: A Study247-255
Vishal Passricha and Rajesh Kumar Aggarwal
34. A Fuzzy Effective Curvic Analysis Approach for Building Extractions over Satellite Images.....257-266
Sandhya and Archana
35. Simulation and Comparison of SPWM and SVPWM Control for Two Level Inverter267-273
Shweta Singh and A.N. Tiwari
36. A Comprehensive Study on Foreign Currency Recognition Systems for Visually Challenged People275-284
and a Feasible Solution for Indian Currency Recognition
Vishwas Raval and Apurva Shah
37. Performance Analysis and Comparison between Two Technique of GPON Network for.....285-290
Various Communication Application
Sanjeev Verma, Supriya Raturi and Malay Ranjan Tripathy
