

International Journal of EMBEDDED SOFTWARE AND OPEN SOURCE SYSTEMS

VOLUME 8

ISSUE 2

JULY-DECEMBER 2018

Contents

- Computational Modeling of Powder Compaction Process Using Finite Element Method 53-58
A. P. Partha, B. M. Raja Prakash and T. Jagadish
- Composite Laminates Subjected to Low Velocity Impact, An Experimental Investigation 59-61
on the Response
B. Anil Kumar and H. K. Shivanand
- Critical Analysis of the Stock-in-process of a Conveyor Belt Manufacturing Unit 63-72
Through Computer Simulation
Sanjeev Kumar, Somnath Chattopadhyaya and Anurag Mishra
- Evaluation of Tensile Properties of Epoxy Based E-Glass-Carbon Woven Fabric Laminates 73-80
S. Shankar, H. K. Shivanand and M. M. Benal
- Experimental Investigation of H-38 (R290+R600a) as an Alternative to R134a 81-84
for Small Capacity Refrigerator
Milind S Patil, Ramchandra. S. Jahagidar, Eknath R Deore and Purshotam Desale
- Emissions from Copper Coated Two Stroke Spark Ignition Engine with Gasohol 85-89
with Catalytic Converter
S. Narasimha Kumar, M.V.S. Murali Krishna, P.V.K. Murthy, V.V.R. Seshagiri Rao and D. N. Reddy
- Strength Comparison of Ti-Alloys Used as Orthopedic Implant Materials by FEA 91-96
H. G. Hanumantharaju and H. K. Shivanand
- Non-invasive Evaluation of Absolute Intracranial Pressure Based on Patient-Specific 97-103
Finite Element Simulation
Yunhua Luo and Zhaoxia Li
- A Significant Computational Device of Modeling of Inverse Heat Transfer Problems 105-114
A. K. Borah
- Optimization of Thickness Variation of Cone Formed by Superplastic Forming of 115-119
Ti-6Al-4V Alloy
J. Babu, Abhijit Dutta and Amith Kumar
