

Indian Journal of Systems Engineering and Electronics

Volume 7, Number 2 (2018)

Contents

- An Efficient Design of Low Power Sequential Circuit Using Clocked Pair Shared Flip Flop** 85-94
D. Mahesh Kumar and Dr. R. Kannusamy
- Low Complexity Background Subtraction and Adaptive Noise Elimination for Moving Object Segmentation** 95-103
*Nuwan Sanjeewa and Won Ho Kim**
- An Efficient Multichannel FIR Filter Architecture for FPGA and ASIC Realizations** 105-123
J. Britto Pari¹ and D. Vaithiyanathan²
- Noise Reduction and Restoration of Image Using SD-VMRCT** 125-136
¹Ravi Ajmeera, ²Dr. P.V. Naganjaneyulu, ³Dr. M.N. Giriprasad
- Design Optimization of a Pico Linear Permanent Magnet Generator with Novel Shaped Magnet for Wave Energy Conversion using Finite Element Analysis** 137-152
Aamir Hussain Memon, Taib bin Ibrahim and Perumal Nallagowden
- Electrical Energy Billing System Based On Smart Meter and GSM** 153-174
Mahmoud Shaker Nasr and Ahmed Mohammed Merza
