

International Journal of Analogue Circuits VLSI and Bioelectronics

Volume 8 • Number 2 • July-December 2018

CONTENTS

1. A Value Based Replica Replacement Approach for Replica Replacement in 79-88
Data Grid
Sudalai Muthu T and Ramesh Kumar K
2. A Multi Objective Group Search Optimization for Energy Efficient Clustering..... 89-101
in Multi-Hop Wireless Sensor Network
A. Thirupathaiah and S.V.N. Srinivasu
3. DFT Based Single Channel Speech Enhancement Using Modified Gamma 103-111
Function
V. Vijayasri Bolisetty, I. Santhi Prabha and Yedukondalu Udara
4. Heart Disease Data Classification Using Hybrid Group Search Optimization 113-121
with Particle Swarm Optimization
M. Babu and N. Ramaraj
5. Augmenting Classification of Alzheimer with Feature Selection 123-133
Chellammal and Venkatachalam
6. An Efficient Information Retrieval System Using Hybrid Cuckoo Based Query 135-148
Flow Graph for Query Recommendation
Jagan S and Rajagopalan S.P
7. Defect Prediction in Medical Software Using Hybrid Cuckoo Search Optimized 149-161
Support Vector Machines
C. Shyamala and S.A. Sahaaya Arul Mary
