

# International Journal of SUSTAINABLE CIVIL ENGINEERING

Volume 6

Number 2

July-December 2014

## CONTENTS

4  
326

- Efficient three Dimensional Seismic Analysis of a High Rise Building and the Influence of Zone Factors 71-83  
*K. Subramanion, M. Velayutham and K. Nithya Priya*
- Feasibility of Treated Wastewater of Phosphatic Fertilizer Industry as Mixing Water in Cement Mortar 85-91  
*D. V. Satyanarayana Moorthy, G. Reddy Babu and B. Madhusudana Reddy*
- Numerical Approach to Levee Breach as a Key of Flood Disasters in Low Land 93-109  
*Md. Serazul Islam and Tetsuro Tsujimoto*
- Modelling Surface Run-off of a Smallwatershed with Input from Satellite Images 111-121  
*Das R. K., Nkwae B. and Tembo E.*
- Correlation Between Index Properties and California Bearing Ratio Test of Pekarbaru Soils with and Without Soaked 123-133  
*Soewignojo Agus NUGROHO, Muhamad YUSA and Sri Rahayu NINGSIH*
- Characterizing Spatial Variability of Groundwater Levels Using Semivariogram 135-139  
*Jayesh A. Shah and Hasmukh R. Patel*
- An Efficient Method for Dynamic Image Reconstruction 141-146  
*S. Asif Hussain, M. N. Giri Prasad and D. Satya Narayana*
- Effects of Waste PVC on the Properties of Bituminous Mixes 147-154  
*Rasel H. M., Rahman M. N. and Ahmed T. U.*
- Studies on the Effect of Slab on Exterior Reinforced Beam – Column Joints In R. C. Frames 155-162  
*Revathi, R. and Sri Santhi, V. G.*
