

INTERNATIONAL JOURNAL OF GEOTECHNICS AND ENVIRONMENT

Volume 11

Number 2

December 2019

Contents

- Near-Surface Geophysics in Geotechnical Site Characterisation, Application and Case Histories
Oyedele, K. F. 95-110
- Quantification of Discharge through the Composite Liner due to Geomembrane Defect
Sheela Evangelene Yasodian, Rakesh Kumar Dutta, N. P. Nisha and S. Salila 111-128
- Triaxial Compression of Fiber-reinforced Clay
Rabindra Kumar Kar, Pradip Kumar Pradhan and Asutosh Naik 129-141
- Recent Developments and Techniques Available for Removal of Arsenic
Dharmendra 143-150
- Study of Effect of Dynamic Soil-structure Interaction for Seismic Response of Cable-stayed Bridges Including Nonlinear Behaviour of Soil and Bridge
Siddharth G. Shah, Jatin A. Desai and Chandresh H. Solanki 151-160
- The Lateral Pile Response with Different Soil Strength Parameters
Jasim M Abbas Al-Shamary 161-167
- Determination of Liquefaction Susceptibility of Soil based on CPT: A Least Square Support Vector Machine Approach
Pijush Samui and J. Karthikeyan 169-178
- Investigation of Effective Parameters on the Embankment Dam Filter Behavior in Simultaneous Cracking in the Core and Filter
S. M. Ali Zomorodian and Mohammad Jamali Moghadam 179-193
- Triaxial Compression of Fiber-reinforced Clay
Rabindra Kumar Kar, Pradip Kumar Pradhan and Ashutosh Naik 195-209
