CONTENTS

Turning processes investigation of materials austenitic, martensitic and duplex stainless steels and prediction of cutting forces using artificial neural network (ANN) techniques Hasan Basri Ulas & Murat Tolga Ozkan	93
Flow behavior modeling and processing maps for P91 steel during hot deformation Zhiying Chen, Ying Zhang, Yunlai Ren & Ying Wang	105
Wear resistance evaluation of cryogenically treated AISI-H11 steel: An optimization approach Sanjeev Katoch, Rakesh Sehgal & Vishal Singh	112
Effect of ball-to-powder weight ratio on microstructure evolution of nanocrystalline Mg-Zn powders prepared by mechanical milling Xinrong Chen, Jie Teng, Zili Xu & Yuan Li	126
Response law and diffusion coefficient of moisture in concrete with load stress Jian-Hua Jiang, Fei-Fei Hu, Xiao-Nan Feng & Qiang-Qiang Wang	135
Study of discharge effects by lateral electrodes in EDM A-Cheng Wang, Lung Tsai, Cheng-Yi Liu, Hsin-Min Lee & Yan-Cherng Lin	142
Experimental investigation on microstructural and mechanical properties of quenched AISI 4145 sinter forged steel Venkata Kondaiah E, S Sundarrajan & S Kumaran	149
Microstructure and mechanical properties evolution of AA 2024 alloy subjected to RCS Avinash J, Prabhakar M Bhovi & K Venkateswarlu	155
Tensile and wear behaviour of precipitation hardened AA7xxx (Al-12 Zn-3 Mg-2.5 Cu) alloy V V Ravikumar & S Kumaran	161
Development of structural shape information model using terrestrial laser scanning based on the octree space division method Gichun Cha, Donghwan Lee, Seunghee Park & Innjoon Park	168
