Reg No.:\_\_\_\_\_

Name:\_\_\_\_\_

## APJ ABDUL KALAM TECHNOLOGICAL UNIVERSITY

Fifth semester B.Tech degree examinations (S) September 2020

## Course Code: EE367

## Course Name: New and Renewable Energy Systems

x. M		Hours
		Marks
	What is the present status of various modes of renewable power generations in	(5)
	India? Explain.	
	Differentiate between Pyranometer and Pyrheliometer.	(5)
	Explain the practical equivalent circuit of a solar cell.	(5)
	With the help of a block diagram explain the working of a hybrid OTEC.	(5)
	List out the advantages and disadvantages of wind energy conversion systems.	(5)
	Classify wind power plants based on principle of operation.	(5)
	With neat figure explain the working of a KVIC biogas plant.	(5)
	What are the factors that affect biogas generation	(5)
	PART B	
	Answer any two full questions, each carries 10 marks.	
a)	Elucidate the necessity of energy storage in the context of renewable sources of	(5)
	energy	
b)	Compare between conventional and non-conventional energy resources	(5)
a)	Explain the following terms related to solar geometry	(4)
	(i) Hour Angle (ii) Altitude Angle (iii) Zenith Angle (iv) Surface azimuth angle	
b)	Explain the working of a central tower collector with a neat diagram	(6)
a)	Explain sizing and necessity with reference to energy storage	(5)
b)	Explain construction of solar flat plate collector with a neat diagram	(5)
	PART C Answer any two full auestions, each carries 10 marks.	
a)		(6)
,		(0)
,		(4)
u) b)	Explain the site-selection criteria for OTEC plants	(1)
	<ul> <li>a)</li> <li>b)</li> <li>a)</li> <li>b)</li> <li>a)</li> <li>b)</li> <li>a)</li> </ul>	<ul> <li>India? Explain.</li> <li>Differentiate between Pyranometer and Pyrheliometer.</li> <li>Explain the practical equivalent circuit of a solar cell.</li> <li>With the help of a block diagram explain the working of a hybrid OTEC.</li> <li>List out the advantages and disadvantages of wind energy conversion systems.</li> <li>Classify wind power plants based on principle of operation.</li> <li>With neat figure explain the working of a KVIC biogas plant.</li> <li>What are the factors that affect biogas generation</li> <li>PART B</li> <li>Answer any two full questions, each carries 10 marks.</li> <li>Elucidate the necessity of energy storage in the context of renewable sources of energy</li> <li>Compare between conventional and non-conventional energy resources</li> <li>Explain the following terms related to solar geometry         <ul> <li>(i) Hour Angle (ii) Altitude Angle (iii) Zenith Angle (iv) Surface azimuth angle</li> <li>Explain the working of a central tower collector with a neat diagram</li> <li>Explain sizing and necessity with reference to energy storage</li> <li>Explain construction of solar flat plate collector with a neat diagram</li> <li>Explain any two application of solar PV systems with block diagrams.</li> <li>With a neat diagram explain the Grid connected PV systems</li> <li>List out the advantages and disadvantages of a tidal power plant</li> </ul> </li> </ul>

## 03000EE367092003

	(c)	What is biofouling with reference to OTEC power plants	(3)
14	a)	With a neat diagram explain solar cell characteristics.	(4)
	b)	Classify tidal power plants based on the type of basin used.	(6)
15		PART D Answer any two full questions, each carries 10 marks.	(6)
15	a)	Derive the expression for power in the wind turbine.	(6)
	b)	Explain yaw control mechanism.	(4)
16	a)	What are different technologies used in biomass to energy conversion	(6)
	b)	Explain the working principle of a fuel cell.	(4)
17	a)	Explain the importance of biomass programme in India	(4)
	b)	With a neat diagram explain the construction of a propeller type wind power	(6)
		system
