ACI STRUCTURAL JOURNAL

JULY-AUGUST 2016, V. 113, No. 4

A JOURNAL OF THE AMERICAN CONCRETE INSTITUTE
AN INTERNATIONAL TECHNICAL SOCIETY

28
279

- 643 **Experimental Investigation on Effect of Aspect Ratio on Behavior of Isolated Reinforced Concrete Struts**, by Amir H. Ghanei and Reza Aghayari
- 655 **Experimental Study of Nonplanar Wall-to-Beam Connections under Cyclic Loading**, by Saman Abdullah, Nagi Abo-Shadi, and David Naish
- 665 **Seismic Tests on Heavyweight Concrete Shear Walls with Wire Ropes as Lateral Reinforcement**, by Ju-Hyun Mun, Keun-Hyeok Yang, and Yongjei Lee
- 677 **Shear Behavior of Externally Prestressed Concrete Beams with Draped Tendons**, by Jia-Nan Qi, Jing-Quan Wang, Zhongguo John Ma, and Teng Tong
- 689 **New Extended Finite Element Method for Pinching Effect in Reinforced Concrete Columns**, by Jiangtao Yu, Kequan Yu, Xingyan Shang, and Zhoudao Lu
- 701 **Experimental Studies of Reinforced Concrete Beams Using Embedded Steel Trusses**, by Nan Zhang, Chung C. Fu, Liang Chen, and Lu He
- 711 **Sliding Shear Resistance of Squat Walls under Reverse Loading: Mechanical Model and Parametric Study**, by Harald Schuler and Burkhardt Trost
- 723 **Arrangement of Transverse Reinforcement in Hollow Piers Subjected to Lateral Load**, by Néstor I. Prado, Gerardo Aguilar, Oscar López, Roberto Gómez, and José A. Escobar
- 735 **Second-Order Effects on Seismic Response of Slender Bridge Columns**, by Rigoberto Burgueño, Ata Babazadeh, Lauren K. Fedak, and Pedro F. Silva
- 747 **Simplified Approach for Assessing Shear Resistance of Reinforced Concrete Beams under Impact Loads**, by Wei-Jian Yi, De-Bo Zhao, and Sashi K. Kunnath
- 757 **Serviceability and Ultimate Load Behavior of Concrete Beams Reinforced with Basalt Fiber-Reinforced Polymer Bars**, by Thilan Ovitigala, Mustapha A. Ibrahim, and Mohsen A. Issa
- 769 **Prediction of Long-Term Deflections for High-Speed Railway Prestressed Concrete Beams**, by Weichen Xue, Ting Liu, and Min Zeng

Contents cont. on next page

Discussion is welcomed for all materials published in this issue and will appear ten months from this journal's date if the discussion is received within four months of the paper's print publication. Discussion of material received after specified dates will be considered individually for publication or private response. ACI Standards published in ACI Journals for public comment have discussion due dates printed with the Standard.

The *ACI Structural Journal* (ISSN 0889-3241) is published bimonthly by the American Concrete Institute. Publication office: 38800 Country Club Drive, Farmington Hills, MI 48331. Periodicals postage paid at Farmington, MI, and at additional mailing offices. Subscription rates: \$166 per year (U.S. and possessions), \$175 (elsewhere), payable in advance. POSTMASTER: Send address changes to: *ACI Structural Journal*, 38800 Country Club Drive, Farmington Hills, MI 48331.

Canadian GST: R 1226213149.

Direct correspondence to 38800 Country Club Drive, Farmington Hills, MI 48331. Telephone: +1.248.848.3700. Facsimile (FAX): +1.248.848.3701. Website: <http://www.concrete.org>.

CONTENTS

- 779 **Influence of Tension Loading Protocol on Crack Cycling Tests on Undercut Anchors**, by Akanshu Sharma, Vinay Mahadik, and Jan Hofmann
- 791 **Strut Efficiency-Based Design for Concrete Deep Beams Reinforced with Fiber-Reinforced Polymer Bars**, by Khaled Mohamed, Ahmed Sabry Farghaly, and Brahim Benmokrane
- 801 **Effect of Preexisting Cracks on Lap Splice Strength of Reinforcing Bars**, by Jiqiu Yuan, Matthew O'Reilly, Adolfo Matamoros, and David Darwin
- 813 **Analytical Model for Compressive Arch Action in Horizontally Restrained Beam-Column Subassemblages**, by Shao-Bo Kang and Kang Hai Tan
- 827 **Performance of Punching Shear Reinforcement under Gravity Loading: Influence of Type and Detailing**, by Jürgen Einpaul, Fabio Brantschen, Miguel Fernández Ruiz, and Aurelio Muttoni
- 839 **Behavior of Storage Cells in Condeep Structure under Hydrostatic Pressure**, by Amr I. I. Helmy and Michael P. Collins
- 851 **Reversed Cyclic Experiments on Shear Stress Transfer across Cracks in Reinforced Concrete Elements**, by Paolo M. Calvi, Evan C. Bentz, and Michael P. Collins
- 861 **Punching Shear Capacity of Continuous Slabs**, by Jürgen Einpaul, Carlos E. Ospina, Miguel Fernández Ruiz, and Aurelio Muttoni
- 873 **Discussion**
- Experimental Investigation of Prestress Losses in Full-Scale Bridge Girders.** Paper by David B. Garber, José M. Gallardo, Dean J. Deschenes, and Oguzhan Bayrak
- Sustained Service Load Behavior of Concrete Beams with Recycled Concrete Aggregates.** Paper by Adam M. Knaack and Yahya C. Kurama
- Compressive Strength of Unreinforced Struts.** Paper by Lucas Laughery and Santiago Pujol

UPCOMING ACI CONVENTIONS

The following is a list of scheduled ACI conventions:

2016—October 23-27, Marriott Philadelphia, Philadelphia, PA

2017—March 26-30, Detroit Marriott at the Renaissance Center, Detroit, MI

2017—October 15-19, Disneyland Hotel, Anaheim, CA

For additional information, contact:

Event Services, ACI

38800 Country Club Drive, Farmington Hills, MI 48331

Telephone: +1.248.848.3795

e-mail: conventions@concrete.org

ON COVER: 113-S73, p. 852, Fig. 2—Experimental setup: (a) membrane element tester; (b) 3-D coordinate scanner; and (c) back view of instrumented specimen.

Permission is granted by the American Concrete Institute for libraries and other users registered with the Copyright Clearance Center (CCC) to photocopy any article contained herein for a fee of \$3.00 per copy of the article. Payments should be sent directly to the Copyright Clearance Center, 21 Congress Street, Salem, MA 01970. ISSN 0889-3241/98 \$3.00. Copying done for other than personal or internal reference use without the express written permission of the American Concrete Institute is prohibited. Requests for special permission or bulk copying should be addressed to the Managing Editor, *ACI Structural Journal*, American Concrete Institute.

The Institute is not responsible for statements or opinions expressed in its publications. Institute publications are not able to, nor intend to, supplant individual training, responsibility, or judgment of the user, or the supplier, of the information presented.

Papers appearing in the *ACI Structural Journal* are reviewed according to the Institute's Publication Policy by individuals expert in the subject area of the papers.

Contributions to *ACI Structural Journal*

The *ACI Structural Journal* is an open forum on concrete technology and papers related to this field are always welcome. All material submitted for possible publication must meet the requirements of the "American Concrete Institute Publication Policy" and "Author Guidelines and Submission Procedures." Prospective authors should request a copy of the Policy and Guidelines from ACI or visit ACI's website at www.concrete.org prior to submitting contributions.

Papers reporting research must include a statement indicating the significance of the research.

The Institute reserves the right to return, without review, contributions not meeting the requirements of the Publication Policy.

All materials conforming to the Policy requirements will be reviewed for editorial quality and technical content, and every effort will be made to put all acceptable papers into the information channel. However, potentially good papers may be returned to authors when it is not possible to publish them in a reasonable time.

Discussion

All technical material appearing in the *ACI Structural Journal* may be discussed. If the deadline indicated on the contents page is observed, discussion can appear in the designated issue. Discussion should be complete and ready for publication, including finished, reproducible illustrations. Discussion must be confined to the scope of the paper and meet the ACI Publication Policy.

Follow the style of the current issue. Be brief—1800 words of double spaced, typewritten copy, including illustrations and tables, is maximum. Count illustrations and tables as 300 words each and submit them on individual sheets. As an approximation, 1 page of text is about 300 words. Submit one original typescript on 8-1/2 x 11 plain white paper, use 1 in. margins, and include two good quality copies of the entire discussion. References should be complete. Do not repeat references cited in original paper; cite them by original number. Closures responding to a single discussion should not exceed 1800-word equivalents in length, and to multiple discussions, approximately one half of the combined lengths of all discussions. Closures are published together with the discussions.

Discuss the paper, not some new or outside work on the same subject. Use references wherever possible instead of repeating available information.

Discussion offered for publication should offer some benefit to the general reader. Discussion which does not meet this requirement will be returned or referred to the author for private reply.
