# ACI STRUCTURAL JOURNAL

**JANUARY-FEBRUARY 2017, V. 114, No. 1**

A JOURNAL OF THE AMERICAN CONCRETE INSTITUTE  
AN INTERNATIONAL TECHNICAL SOCIETY

31  
279

- 3 Analytical Modeling of Ultra-High-Performance Fiber-Reinforced Concrete Behavior in Ribbed Plates**, by Florent Baby, Pierre Marchand, and François Toutlemonde
- 15 Experimental Investigation of Prestressing Strand Bond on Behavior of Concrete Members**, by Jan Laco and Viktor Borzovič
- 25 Hysteresis Modeling of Reinforced Concrete Structures: State of the Art**, by Piyali Sengupta and Bing Li
- 39 Shear Strength of Circular Concrete Beams Reinforced with Glass Fiber-Reinforced Polymer Bars and Spirals**, by Ahmed H. Ali, Hamdy M. Mohamed, and Brahim Benmokrane
- 51 Shear Capacity of Precast Prestressed Concrete Beam-Column Joint Assembled by Unbonded Tendon**, by Kiwoong Jin, Kazuhiro Kitayama, Sunghoon Song, and Kiyomi Kanemoto
- 63 Structural Behavior of Reinforced Concrete Frames Subjected to Progressive Collapse**, by Jun Yu and Kang Hai Tan
- 75 Behavior of Post-Installed Fastening under Seismic Action**, by Giovanni Muciaccia
- 87 Shear Behavior of Reinforced Concrete Deep Beams**, by Kameran S. Ismail, Maurizio Guadagnini, and Kypros Pilakoutas
- 101 Developing Ductility Using Concrete Anchorage**, by C. Trautner, T. Hutchinson, M. Copellini, P. Grosser, R. Bachman, and J. Silva
- 113 Impact Resistance of Reinforced Ultra-High-Performance Concrete Beams with Different Steel Fibers**, by Doo-Yeol Yoo, Nemkumar Banthia, and Young-Soo Yoon
- 125 Fatigue Behavior of Partially Composite-Insulated Concrete Sandwich Walls**, by Nathan Teixeira and Amir Fam
- 137 New Approach to Predict Shear Capacity of Reinforced Concrete Beams Strengthened with Near-Surface-Mounted Technique**, by Hadi Baghi and Joaquim A. O. Barros
- 149 Out-of-Plane Behavior of Reinforced Concrete Bearing Walls after One-Sided Fire**, by Kevin A. Mueller and Yahya C. Kurama

*Contents cont. on next page*

Discussion is welcomed for all materials published in this issue and will appear ten months from this journal's date if the discussion is received within four months of the paper's print publication. Discussion of material received after specified dates will be considered individually for publication or private response. ACI Standards published in ACI Journals for public comment have discussion due dates printed with the Standard.

# CONTENTS

- 161 **Side-Face Blowout Failure of Large-Diameter High-Strength Headed Bars in Beam-Column Joints**, by Sung-Chul Chun, Chang-Sik Choi, and Hyung-Suk Jung.
- 173 **Investigation of Interface Shear Transfer Using Push-Through Tests**, by Christopher S. Williams, Joshua B. Massey, Oguzhan Bayrak, and James O. Jirsa
- 187 **Modeling of Transfer Region with Local Bond-Slip Relationships**, by Chadon Lee, Songhee Lee, and Sangmin Shin
- 197 **Cyclic Load Tests of Reinforced Concrete Columns with High-Strength Bundled Bars**, by Jong-Jin Lim, Hong-Gun Park, and Tae-Sung Eom
- 209 **Shear Behavior and Crack Control Characteristics of Hybrid Steel Fiber-Reinforced Concrete Panels**, by Stamatina G. Chasioti and Frank J. Vecchio
- 221 **Behavior of Monotonically Loaded Slab-Column Connections Reinforced with Shear Studs**, by Thai X. Dam, James K. Wight, and Gustavo J. Parra-Montesinos
- 233 **Magneto-Electric Control of Scaled-Down Reinforced Concrete Beams**, by Iman Abavisani, Omid Rezaifar, and Ali Kheyroddin
- 245 **Bearing Angle Model for Bond of Reinforcing Bars in Concrete**, by Oan Chul Choi and Hajin Choi
- 255 **Conventional and High-Strength Hooked Bars—Part 1: Anchorage Tests**, by J. Sperry, S. Yasso, N. Searle, M. DeRubeis, D. Darwin, M. O'Reilly, A. Matamoros, L. R. Feldman, A. Lepage, R. D. Lequesne, and A. Ajaam
- 267 **Conventional and High-Strength Hooked Bars—Part 2: Data Analysis**, by J. Sperry, D. Darwin, M. O'Reilly, R. D. Lequesne, S. Yasso, A. Matamoros, L. R. Feldman, and A. Lepage
- 277 **Shear Strength and Behavior of High-Strength Concrete Prestressed Beams**, by Sandra Villamizar, Julio A. Ramirez, and Gerardo Aguilar
- 291 **Discussion**  
**Revisiting Unreinforced Strut Efficiency Factor**. Paper by Ray Kal Leung Su and Daniel Ting Wee Looi

## UPCOMING ACI CONVENTIONS

The following is a list of scheduled ACI conventions:

2017—March 26-30, Detroit Marriott at the Renaissance Center, Detroit, MI

2017—October 15-19, Disneyland Hotel, Anaheim, CA

2018—March 25-29, Grand America & Little America, Salt Lake City, UT

### For additional information, contact:

Event Services, ACI  
38800 Country Club Drive, Farmington Hills, MI 48331  
Telephone: +1.248.848.3795  
e-mail: [conventions@concrete.org](mailto:conventions@concrete.org)

**ON COVER:** 114-S09, p. 105, Fig. 3—Typical fracture surfaces and regions of significant paste flow: (a) F1554 Grade 36 CW; (b) F1554 CW-A; (c) F1554 HR; and (d) A193 B7.

Permission is granted by the American Concrete Institute for libraries and other users registered with the Copyright Clearance Center (CCC) to photocopy any article contained herein for a fee of \$5.00 per copy of the article. Payments should be sent directly to the Copyright Clearance Center, 21 Congress Street, Salem, MA 01970. ISSN 0891-3241/08 \$5.00. Copying done for other than personal or internal reference use without the express written permission of the American Concrete Institute is prohibited. Requests for special permission or bulk copying should be addressed to the Managing Editor, *ACI Structural Journal*, American Concrete Institute.

The Institute is not responsible for statements or opinions expressed in its publications. Institute publications are not able to, nor intend to, supplant individual training, responsibility, or judgment of the user, or the supplier, of the information presented.

Papers appearing in the *ACI Structural Journal* are reviewed according to the Institute's Publication Policy by individuals expert in the subject area of the papers.

## Contributions to *ACI Structural Journal*

The *ACI Structural Journal* is an open forum on concrete technology and papers related to this field are always welcome. All material submitted for possible publication must meet the requirements of the "American Concrete Institute Publication Policy" and "Author Guidelines and Submission Procedures." Prospective authors should request a copy of the Policy and Guidelines from ACI or visit ACI's website at [www.concrete.org](http://www.concrete.org) prior to submitting contributions.

Papers reporting research must include a statement indicating the significance of the research.

The Institute reserves the right to return, without review, contributions not meeting the requirements of the Publication Policy.

All materials conforming to the Policy requirements will be reviewed for editorial quality and technical content, and every effort will be made to put all acceptable papers into the information channel. However, potentially good papers may be returned to authors when it is not possible to publish them in a reasonable time.

### Discussion

All technical material appearing in the *ACI Structural Journal* may be discussed. If the deadline indicated on the contents page is observed, discussion can appear in the designated issue. Discussion should be complete and ready for publication, including finished, reproducible illustrations. Discussion must be confined to the scope of the paper and meet the ACI Publication Policy.

Follow the style of the current issue. Be brief—1800 words of double spaced, typewritten copy, including illustrations and tables, is maximum. Count illustrations and tables as 300 words each and submit them on individual sheets. As an approximation, 1 page of text is about 300 words. Submit one original typescript on 8-1/2 x 11 plain white paper, use 1 in. margins, and include two good quality copies of the entire discussion. References should be complete. Do not repeat references cited in original paper; cite them by original number. Closures responding to a single discussion should not exceed 1800-word equivalents in length, and to multiple discussions, approximately one half of the combined lengths of all discussions. Closures are published together with the discussions.

Discuss the paper, not some new or outside work on the same subject. Use references wherever possible instead of repeating available information.

Discussion offered for publication should offer some benefit to the general reader. Discussion which does not meet this requirement will be returned or referred to the author for private reply.
