CONTENTS

Review Article

- Assessment of geotechnical properties of lunar soil simulant's for lunar missions 317
Prabu Thannasi, Kasinathan Muthukkumaran & Venugopal Indaram
- Additive manufacturing: The significant role in biomedical and aerospace applications 330
Meena Pant, Pritam Pidge, Harish Kumar, Leeladhar Nagdeve & Girija Moona

Research Article

- Designed and fabricated a low-cost E-Spun experimental tool for polymer processing 343
Chetan Chavan, Rajashekhar Fakeerappa Bhajantri, Soumya Siddalingappa Bulla & Kathiresan Sakthipandi
- Ground granulated blast furnace slag based geopolymer mortar activated with low concentration alkali 350
Ashita Singh, Sudhir Singh Bhadauria, Manish Mudgal & Avanish Kumar Srivastava
- Parametric optimization of yield percent of chitosan extracted from fish scale (*Labeo rohita*) through central composite design approach 358
Deepshikha Datta, Sumit Mahto & Bimal Das
- Kinetics, absorption and diffusion mechanism of crosslinked Chitosan Hydrogels 374
Sakshi Nangia, Deeksha Katyal & Sudhir Warkar
- Optimization of process parameters of TIG welding of duplex stainless steel without filler rod by grey-Taguchi method 385
Sandip Mondal, Pradip Kumar Pal & Goutam Nandi
- Effects of iron powder on properties of geopolymers subjected to different curing regimes 393
Nihan Gulmez & Niyazi Ugur Kockal
- Accurate localization technique for stamping sheet metal parts with complex surfaces 409
Emre Esener
- Power system stability investigation through smart control of micro grid and GUPFC 420
Abinash Singh & Balwinder Singh Surjan
