Name:

# APJ ABDUL KALAM TECHNOLOGICAL UNIVERSITY

Sixth semester B.Tech degree examinations (S), September 2020

## Course Code: EC312 Course Name:Object Oriented Programming

Max. Marks: 100

**Duration: 3 Hours** 

## PART A

## Answer any two full questions, each carries 15 marks

- 1 a) Mention any 4 benefits and any 4 applications of OOP.
  - b) Write the following program. Create a class named distance with private (7) variables x1, y1, x2, y2. Write a parameterized constructor to initialize the member variables. Write a member function to compute the distance between the points (x1, y1) and (x2, y2). Write a member function to display the values of x1, y1, x2, y2 and the distance between them. Write a main function to test the class.
- 2 a) What is unary operator overloading? Explain with a sample code. (7)
  - b) What type of inheritance does the following code implement?

Identify and correct the error in the following code, if any. Explain the program and the output.

```
#include <iostream>
using namespace std;
class Automobile {
public:
      Automobile () {
             cout<< "This is an Automobile" <<endl;</pre>
      }
};
class TwoWheeler {
public:
      TwoWheeler() {
             cout<< "This is a 2 wheeler Vehicle" <<endl;</pre>
      }
};
class Bike: public Automobile, public TwoWheeler {
};
int main()
ł
      Bikeobj;
      return 0;
}
```

3 a) Write a program in C++ to print all the numbers less than 100 in the Fibonacci (7) series.

b) Explain with proper diagrams any 4 types of inheritance in C++. (8)

. . . . .

Marks (8)

(8)

#### 03000EC312052002

## PART B

## Answer any two full questions, each carries 15 marks

- 4 a) What is this pointer? Give a sample code illustrating any one application of this (7) pointer.
  - b) What are packages in Java? What are the steps to add a class to a package? (8)
- 5 a) What is a virtual function? Explain with a sample code. (7)
  - b) Write a program to create three threads A, B, C in Java using the thread class. (8) Thread A shall print all the even natural numbers less than 100, Thread B shall print all the natural numbers divisible by 3 and less than 100, Thread C shall print all the numbers which are common in Thread A and Thread B.
- 6 a) What is the output of the following code? Explain

```
(8)
```

```
#include<iostream>
using namespace std;
class Parent
ł
      public:
            virtual ~Parent() {cout<<"In Destructor A\n"; }</pre>
};
class Child: public Parent
ł
      public:
             ~Child() {cout<<"In Destructor B\n"; }</pre>
};
int main()
ł
      Parent *ptr = new Child();
      delete ptr;
      return 0;
}
```

b) Explain the use of 'super' keyword with an example.

(7)

# PART C

## Answer any two full questions, each carries 20 marks

- 7 a) What are activities in android? Draw the android activity cycle diagram and explain (10) the callback methods.
  - b) Explain Uses-permission and Use-sdk in labels in AndroidManifest.xml file. (10)
- 8 a) What are broadcast receivers? Explain creation and registering of broadcast receiver (10) with an example.
  - b) Explain what is Android Virtual Device? Write any four functionalities of AVD. (10)
- 9 a) Explain any 5 UI controls used in android. (10)
  - b) What is AndroidManifest.xml file in android? What are the details included in the (10) file?
